

Note: answers that are **red** are ones that that teams will have to provide, years in **blue** are always provided for relative reference in helping to fill out the timeline, and answers in black are ones that are given at the start of the bonus. Boxes that are **green** will only be scored on teams that use the internet. Events are represented as lines, while time periods are (will be) represented by shaded boxes. If you feel the questions are too hard or too easy, or that I should scrap the bonus entirely, let me know.

Thoughts for other extensions, ones that should be mostly gettable:
