A. Where in the world is Carmen Sandiego ?

Did you ever play this game? I did and thought it was brilliant, so I made my own version. Each of these questions is a clue to a famous world monument (natural or man-made). They are made in the style of a British Cryptic Crossword, so here are a few clues to help you out:

- If it's capitalized, then it is important!
- You might need to Google bits of a clue. That's just the way they are written. ☺
- You won't be able to Google the whole thing though.
- If you're stuck, break down each clue, look at form and in some cases individual words.
- Cryptics love to employ abbreviations and syllabic clues.
