Originally the infirmary, Thompson is directly behind Mission Park on Park Street. The large central corridors are lined with rooms of varying sizes, making it a good place for seniors, juniors, and sophomores. Plentiful bathroom s mean that most people only share with 3 to 4 other people. Both common rooms have tvs and working fire places and the spacious kitchen contains all the necessities of college cooking. The huge balcony rivals those of Currier and Spencer. It has been known to have an inflatable pool that can serve as a hot-tub in the winter.

- Large bookcase for 2 people

Adjustable Bed Height: Yes

Closet: Yes

2 large closets - can fit the dresser inside~

White Board on door: No

Slanted Ceilings: No

Light

Number of Windows: 5

Plenty of natural light: Yes

The walls are mostly windows so there was a lot of light.

They face North and West)

Time of day with most light: Afternoon

Without additional light, the room is well lit: No

Additional Comments: Lamps are needed after dark because the overhead light fails to illuminate the whole room. The closets also have no lighting, so I set up a clip lamp inside.

Temperature

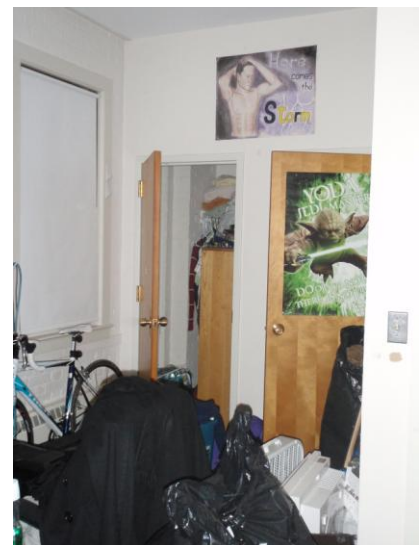

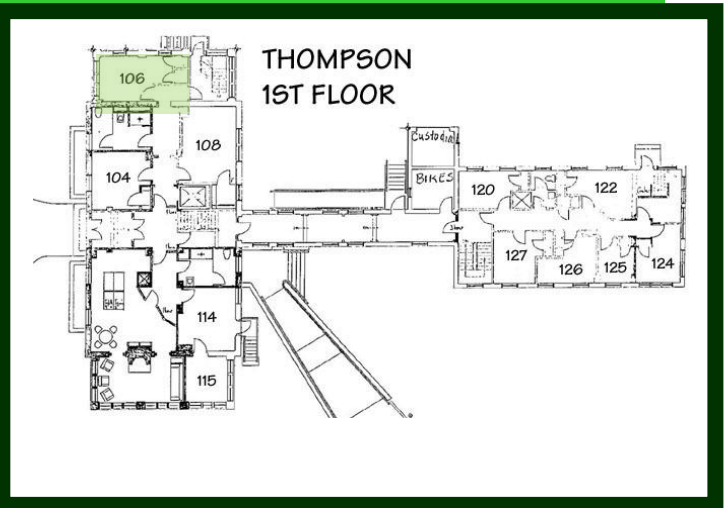

Room Temperature: Cold

This used to be a porch and so there is very little insulation - there is no foundation, the brick walls inside the room are literally the walls on the outside. The windows are also drafty..

Ability to adjust heat: Yes, there is a thermostat
But it didn't work

Unique Quirks

Brick walls are hard to hang stuff on. I may have left many hooks on the walls. Used to be a double so it's HUGE!

Bathroom

People who share the bathroom: 2 to 3

Sinks: 1

Toilets: 1

Bathtubs: Shower

Windows: 1 window

Other comments: Shower flow is really low. I showered down the hall by the kitchen. Nice shelving in the bathroom to put stuff on (toothpaste...etc).

Two whole walls of windows! But the curtains are kind of ugly.

Time of day with most light: Don't notice

Without additional light, the room is well lit: No

Additional Comments: Small overhead light. Lamps are recommended.

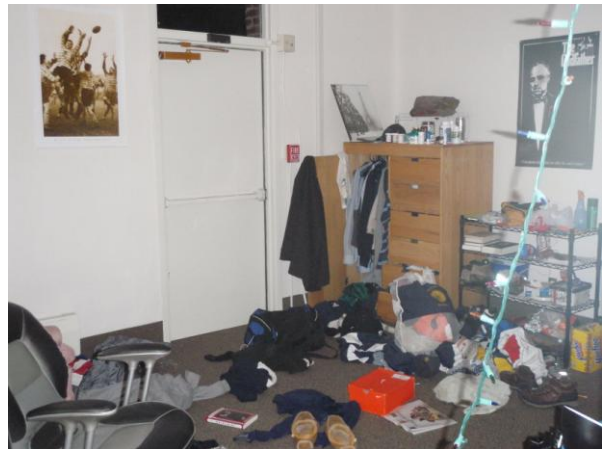

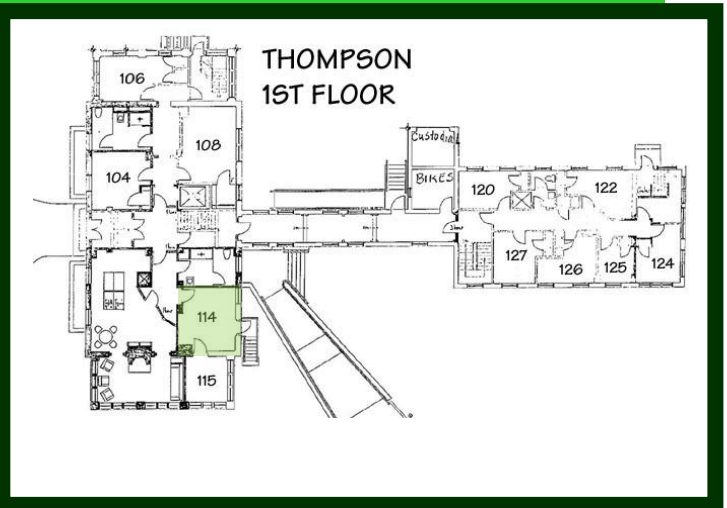

Temperature

Room Temperature: Normal

Ability to adjust heat: There is no way to adjust the temperature

Unique Quirks

There's a "fire escape" door to the outside that you can use to get to class. My room (the back room) was pretty small. The front room is huge.

Bathroom

People who share the bathroom: 1

Sinks: 1

Toilets: 1

Bathtubs: Shower

Windows: 1 window

Other comments: The bathroom is the common bathroom, so it is used during parties. But all the other times it's just you and your roommate. It's also handicap accessible, so it's rather large with a detachable shower head.

Room is pretty big, but has little window space.

Time of day with most light: Morning

Without additional light, the room is well lit: No

Additional Comments: Big room with a little light. I would recommend at least two other lights.

Temperature

Room Temperature: Cold

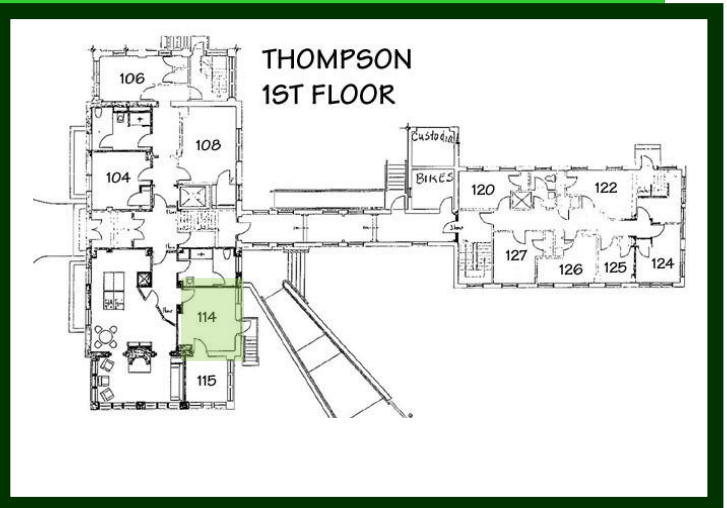

When it is sunny, even in the winter, the room can get quite hot because of the windows. Also, when you open a window from the bottom, notice that the upper pane opens as well and must be closed separately to avoid letting in the cold

Ability to adjust heat: Yes, there is a thermostat

Unique Quirks

12' ceilings three doors: one to the common room, the other room, and to the fire exit. Maintenance shovels the fire exit for you.

2 of the 4 walls are windows. One is brick, the remaining wall almost doesn't exist and makes it possible to hear everything said or done in the common area directly outside. Even if people are talking quietly it is possible to hear them, and since the TV is attached to the wall, sound is conducted fully. There is no audible volume of the TV that will not disturb you.

Bathroom

People who share the bathroom: 2 to 3

Sinks: 1

Toilets: 1

Bathtubs: Shower

Windows: 1 window

Other comments: Closest bathroom is pretty lame. One bathroom, one sink. Right next to the common room so it gets trashed every weekend.

Unique Quirks

My room is "L" shaped. This feature makes it appear rather large since I can house my bed in the head of the "L" and keep the body of my room clean of clutter. Also, there are two large windows facing toward Mission that generally catch the sun's rays in the mornings and early afternoons.

Bathroom

People who share the bathroom: 4 to 5

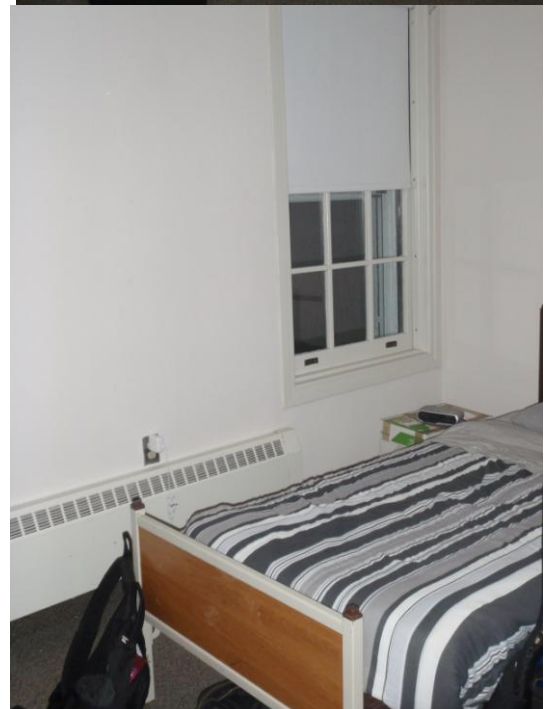

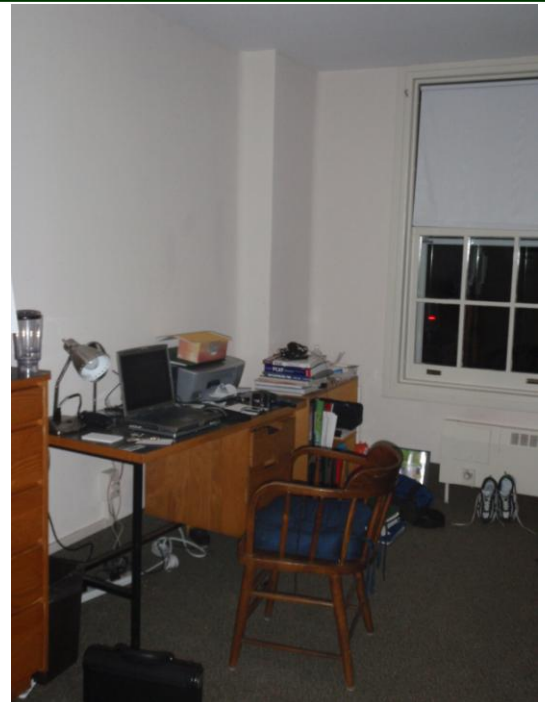

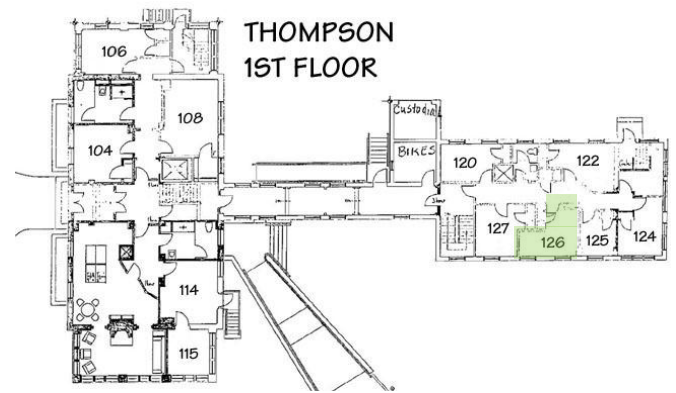

Sinks: 1

Toilets: 1

Bathtubs: Shower

The room is very small, so one window is plenty. There is lots of natural light in the mornings (the window faces east). In the afternoons/evenings, I often turn on an extra lamp.

Time of day with most light: Morning

on the north side, but 5 windows = lots of light

Time of day with most light: Afternoon

Without additional light, the room is well lit: No

Additional Comments: it's a pretty big room, so you need some more light to read and such

Temperature

Room Temperature: Cold

a single brick wall on two sides doesn't provide much insulation from the outdoors, and lots of windows means it's drafty, but it wasn't unbearable with the heat turned up enough

Ability to adjust heat: Yes, there is a thermostat a knob with numbers on each heater

Unique Quirks

This room is now a HUGE single! (It was a pretty good-sized double). There are lots of windows. It used to be a porch, so the brick pillars in each corner make it kind of hard to have furniture flush against both walls of a corner also it's COLD because there's just a brick wall between you and the outside.
